

Robert J. Coelho Middle School

Our vision for Coelho Middle School is that it be a center for the students' educational and personal development.

We envision a setting that focuses on enhancing individual student development, uniqueness, and accountability, where each student is continuously encouraged to develop self-knowledge and self-esteem.

We envision a school community that encourages students, through a variety of educational strategies and cultural experiences, to be responsible problem-solvers and change agents in an evolving, multi-cultural, technological society. Coelho Middle School will be a haven for all. The learning process must be centered on the active involvement of teachers, students, parents, and members of the general community working together to help our students become independent, life-long learners.

We envision a school that promotes academic excellence while striving to involve all in the joys of learning. Our school will help students evaluate and direct themselves.

We envision a school that encourages risk taking and creativity as integral parts of learning.

We envision a school where all of its members, the students, the teachers, the parents, and the community share the responsibility for learners.

We envision Coelho Middle School as a place that empowers young adolescents to move safely and confidently into adulthood so they will realize their full potential and become contributing, responsible members of society.
